

VIM INSTRUCTIONS

Take two Pringles containers and cut roughly as shown. The measurements don't need to be exact - but it's helpful to have a small gap between both cuts to enable a good fit (fig 2)

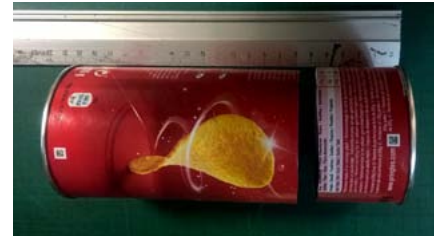

I cut mine at 130mm and 45mm

Add masking tape to guide a straight cut.

1

2

3

Double-sided tape or glue the right-hand-side of the label to the larger of the cut Pringles tube. It's worth practicing before sticking to make sure the label goes on straight.

Double-sided tape or glue the left-hand-side and carefully wrap the tube and stick in place.

4

Use a label or glued paper to stick over the excess glue or doublesided tape - and trim off the excess.

5

Slide the smaller portion into the top. If you cut the length of this part slightly too short it will always fit nicely. You can use it as a lid...

6

Add the indented cardboard disc to the top and you are finished!.
